

# WHAT IS COMMUNITY SOLAR?

Community solar packs both environmental and financial benefits, with no installation or investment needed from participating businesses. When you help power the community with energy from locally-operated solar farms your business is credited on your utility bill, reducing your overall energy costs.

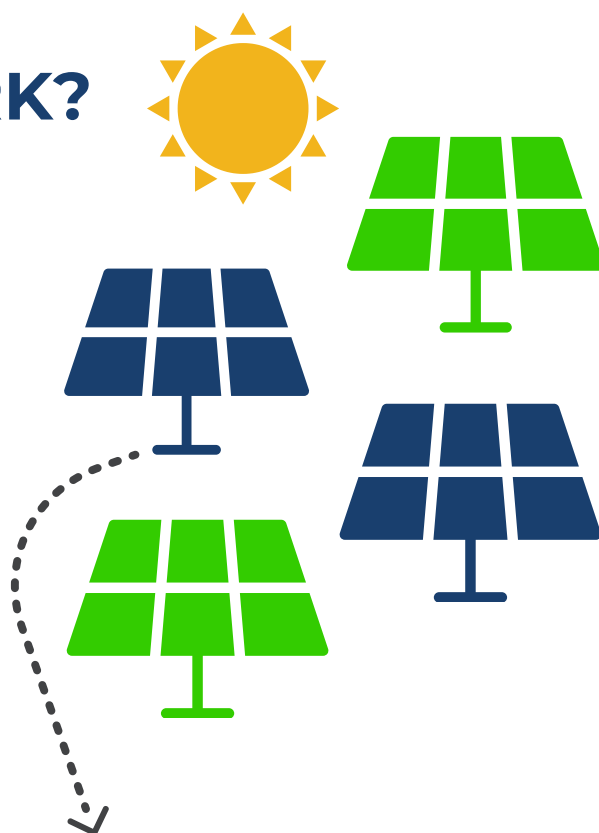

## BENEFITS

- ✓ Savings on your electricity bill.
- ✓ Community benefits such as grid resilience, job creation, and greater community sustainability.
- ✓ Free to join - plus nothing to install and no maintenance!

## HOW DOES IT WORK?

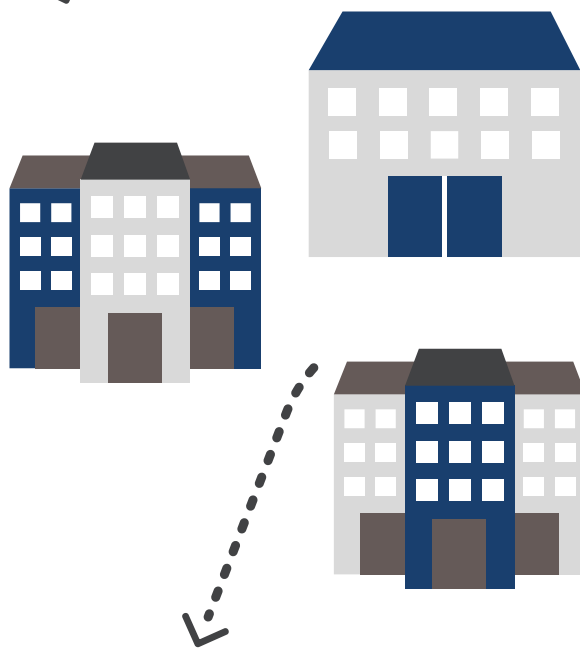

### STEP 1

You're matched with a locally-operated solar farm and assigned your share of the electricity it generates based on typical usage.

### STEP 2

The solar farm delivers clean energy to the grid.

### STEP 3

A credit is applied to your bill based on your share of the solar energy assigned.

### STEP 4

Pay the credit at a discounted rate, lowering your electricity costs month after month.
